

# Secure, Flexible and Fast Remote Access Solution

## #1 Turnkey Remote Access Solution for the Work-from-Home Model

Triofox delivers a proven, secure, and easy-to-use solution for remote access to file servers. Triofox enhances your file servers with secure remote access, mobile file sharing, data protection, and cloud migration ensuring the highest level of data ownership, data security and privacy, compliance, and control.

### Why Triofox is Different?

**Use Triofox to enhance business continuity and help your workforce secure remote and mobile access to file servers when working from any remote location.** Triofox is layered on top of your existing Windows infrastructure and is independent of data location or deployment model. Businesses have an efficient way to increase productivity by minimizing downtime and potential outages.

Whether your needs are migration to a public cloud, private cloud, or file servers on-premises, you will maximize the productivity of your mobile workforce without sacrificing control, security, or privacy. Businesses can combine traditional file server security with mobile productivity to reduce the infrastructure costs associated with data protection and business continuity.

### Triofox Benefits

The key features of Triofox include:

#### FAST & EFFICIENT INSTALLATION

Install and implement quickly and efficiently, in as little as one hour. Since Triofox is layered on your existing Windows infrastructure, it can easily be integrated with your existing on-premises Active Directory.

#### INCREASE PRODUCTIVITY

Increase employee productivity, through 24/7 access to data. No downtime, allowing employees to work from anywhere, any time.

#### SAFE AND SECURE

Data is consistently utilizing a proven process of remote file requests to authenticated queries, to Active Directory and network shares.

#### VERSION CONTROL & BACKUPS

Management and employees can access the file server without additional workflows and system setups. A powerful feature for administration, history and version control seamlessly runs in the background, allowing IT to recover data immediately.

# Triofox Features

## SECURE REMOTE ACCESS

Designed for data protection and business continuity, Triofox provides an extra layer of endpoint encryption, single sign-on, two factor authentication (2FA), and file locking. Client access and guest user access provide greater control for IT management, with secure web file receiving and sharing.

## RANSOMWARE PROTECTION

Integrated ransomware protection, Triofox tracks and monitors unusual activity and locks down any potential attacks providing an extra layer of security for users. Management is immediately notified via alerts.

## AUDITING & REPORTING

Tracking user activities, storage statistics, and file change logs are all features integrated right into the cloud platform. Management can review file movements, in and out of the company, set alerts, and configure policies on downloads.

## 100% DATA GOVERNANCE & COMPLIANCE

Eliminate IT threats and data leakages by ensuring data resides on your servers, while leveraging Active Directory and NTFS permissions.

## ADVANCED CLOUD INTEGRATION

Private or public cloud migrations, cloud file shares, and off-site and/or cloud backups.

## SEAMLESS MAPPED DRIVES

Fully secure, mapped drives easily connect to the file servers, eliminating VPN slowdowns. Boost productivity by also providing files to your employee's mobile phones and web browsers.

# How It Works

1.

### Install Triofox Server

Run the Triofox installer on a clean Windows Sever and the installer will install all dependency components. Basic setup and configuration requires only a few minutes.

2.

### Configure File Server Shares

Enable Active Directory integration and file server discovery. After that you can publish file server network shares to Active Directory users for secure, remote, and mobile access.

3.

### Professional Services

You can use Triofox professional services team for setup, configuration, and training or work directly with one of our authorized partners.
